

**Exclusive Credential  
for Fabrication  
Programs**

FUNDAMENTALS OF  
**METAL FABRICATION**  
CERTIFICATE

The FMA assessment-based Fundamentals of Metal Fabrication Certificate program has been developed for students enrolled in precision sheet metal (PSM) fabrication programs offered through community colleges and technical schools. An industry-recognized certificate will be awarded to those individuals who complete the instructional coursework established by your school and successfully pass the independent assessment.

The certificate exam assesses a student's comprehension of these concepts:

- Metal Fabrication Safety
- Applied Shop Math
- Inspection, Quality Control and Hand Tools
- Blueprint Reading for Metal Fabrication
- Metallurgy for Metal Fabrication
- Precision Sheet Metal Equipment

**FREE – all fees waived through August 31, 2020**

FMA will collaborate with your school's instructors to facilitate student access for the online exam.

Contact Ann Schneider at 815-227-8220 or [anns@fmanet.org](mailto:anns@fmanet.org) for a personal consultation.
